1. Organization’s stated purpose, mission, goals, and values;

The University of South Carolina Beaufort, (hereafter known as USCB), a small (1,000 to 3,000 students/fall headcount enrollment) senior campus of the state's largest public university, brings the University of South Carolina's statewide mission of teaching, research, scholarship, and public service to the rapidly growing Lowcountry of South Carolina. USCB offers baccalaureate degrees that respond to regional needs, draw upon regional strengths, and prepare graduates to participate successfully in communities here and around the globe. The campus also supports the USC Extended Graduate Campus, which provides local access to graduate courses and programs.

USCB offers programs in mathematics and the natural sciences, humanities, and professional and social sciences. Its curriculum is designed to promote acquisition of knowledge and, through it, the intellectual dispositions and skills that encourage depth of understanding, tolerance of others and individual accountability. Attracting a racially and culturally diverse student body of varying ages and experiences, the University of South Carolina Beaufort draws its students primarily from the South Carolina Lowcountry, with representation from other parts of the state, other states, and foreign countries. The University encourages students to think analytically and abstractly, to explore options, to see similarities, to be open to differences, to communicate effectively, and to respect each individual.

The major intellectual and cultural center for the region, the University enriches the quality of life for area residents of all ages through presentations of the performing and fine arts, community service, symposia, research initiatives, and partnerships with area schools, businesses and organizations.

**Goals to Achieve the USCB Mission:**
1. Offer undergraduate degrees to meet the needs of the student population.
2. Provide education in the major area which prepares the student for more advanced study and/or for employment in the field.
3. Provide a learning environment that promotes the acquisition of knowledge and the development of skills that demonstrate depth of understanding, tolerance, accountability, and a commitment to diversity.
4. Place value on quality of undergraduate education and an atmosphere of collegial support through the appropriate allocation of resources.
5. Emphasize quality teaching and provide appropriate faculty-development resources to support teaching excellence.
6. Emphasize research as an integral part of teaching in all academic areas of the University.
7. Provide student development services and programs that assist students in achieving educational, career, and personal goals.
8. Emphasize quality service and programs and provide appropriate staff development resources.
9. Provide the appropriate resources and library and information technology services in support of teaching, research, scholarship, and public service.
10. Provide individuals with opportunities for lifelong learning and cultural enrichment.
11. Develop and maintain partnerships with other entities to better serve the educational needs of the geographic region.
12. Demonstrate the accomplishment of the mission of the University and continuous improvement in its educational programs and services.

**USCB Core Service values:**
- Integrity
- Collaboration
- Innovation
- Responsiveness
- Accountability
- Excellence

**Achievements in Academic Affairs Unit**
- Graduated 102 students with baccalaureate degrees and 18 students with AA/AS degrees
- Hired sixteen new faculty for Fall 2007 in the following disciplines: Art History, Art Studio, Biology, Business, Education, Hospitality, Library, Mathematics, Nursing, and Spanish
- Formed articulation agreement with Georgia Institute of Technology engineering program.
- Increased the number of courses delivered between campuses using Interactive Video Conferencing and web-based course instruction
- Achieved fundraising goal of $1.5 million dollars to complete the second floor of the Science and Technology Building. The second floor will house the Nursing department staff, classrooms and labs. Construction will begin in 2008.
- Designed a new center for Instructional Technology and Academic Resources and named a director
- Established an Academic Advisement Center
- Redesigned University 101 course
- Selected permanent Executive Vice Chancellor for Academic Affairs (EVCAA) to begin in January 2008

**Achievements in the Advancement Unit**
- Conducted USCB Core Values Training Workshops for USCB student workers, faculty and staff.
- Held reception for Spring 2007 graduates and parents to strengthen relationship between USCB and alumni.
- Published the second USCB Annual Report.
**Achievements in Athletics and Recreation Unit**

- Purchased, built and technically connected a modular building for the temporary home of USCB Athletics and Recreation
- Presented a 5-year Athletics plan to USC Board of Trustees
- Director of Athletics Development became Director of Athletics
- Named USCB’s first Cross Country Coach
- USCB was evaluated by and accepted into membership with the National Association of Intercollegiate Athletics (NAIA)
- Hosted the first USCB Intercollegiate Men's Golf tournament with 12 teams participating. (NCAA Division I and II)
- Created the USCBAthletics.com website
- Began preparations for USCB's first athletic teams to compete in Fall 2008 (Golf & Cross Country)
- Initiated and completed USCB’s first Athletics Fundraising golf tournament raising over $98,000
- Hired a dedicated Director of Recreation, reporting to the Athletics Director
- Hired USCB’s first baseball coach
- Upgraded student lounges on North and South campuses with pool and ping pong tables
- Conducted intramural and club teams including 2 flag football teams, a coed soccer team, and intramural soccer
- Department of Recreation opportunities offered included two 5K runs, a North Campus cook-out, a South Campus tailgate party, staff vs. student softball game
- Community & Civic activities included USCB hosting the Lowcountry Shrinkdown Kickoff and weekly weigh-in, the 2006 & 2007 PGA Heritage Classic Expo Village promotion (6 days of promoting USCB), USCB participation in the American Heart Association Walk

**Achievements in Community Outreach Unit**

- Osher Lifelong Learning Institute (OLLI) received a $1,000,000 endowment and a $50,000 grant from the Bernard Osher Foundation.
- Increased membership in the Osher Lifelong Learning Institute (OLLI) by 26%, from 836 at the end of 2005/2006 to 1049 at the end of spring, 2007. Increased the number of courses offered from 200 in 2005/2006 to more than 300 in 2007.
- The Flagship Lecture Series continued its success with a very well attended conference on “U. S. Security Strategy”.
- The continuing education programs, including Continuing Medical Education, English as a Second language, Conversational Spanish, Lunch with the Authors, and Historic tours, all grew significantly in attendance and profitability.
- Initiated a new community lecture series, “Coastal Life Series”, which hosted two conferences focused on “Sustainable Building and Living”.

**Achievements in Finance and Operations Unit**

- Maintained a balanced budget.
- Established the Cyber Café on South Campus.
- Hosted South Carolina Finances Offices Meeting.
• Developed human resources manual for faculty and staff hiring.
• Provided two sexual harassment symposia.
• Continued revisions to the University’s Policy and Procedures Manual
• Hired new officers in the Office of Public Safety.
• Developed a Critical Incidents Response Team.

Achievements in Information Technology Unit
• Implemented online placement testing.
• Created new interactive Library Web Site
• Installed and ran pilot project for Tegrity course capturing system
• Established web portal for the Education Department, Quality Enhancement Plan and Compliance Audit Certification team
• Conducted IT survey and implemented several suggestions obtained from it.
• Organized and conducted 360 Degree evaluation survey for Senior Administration
• Integrated classroom support materials through the use of Blackboard
• Chosen as a finalist in the 2006 cBeta Technology awards for Outstanding Achievement in Education
• Participated in numerous interactions with community entities where we demonstrated our technology infrastructure
• Supplemented staffing with additional desk top support personnel, administrative assistant and server specialist
• Staff participated in conferences and training such as: Educause, Tegrity User Conference, Computers in Libraries, Campus Technology, Infocomm, Active Directory training, Blackboard Institute and SANS Vista Security training
• Implemented web based helpdesk and established helpdesk phone number
• Supported numerous internal and external events with AV equipment and personnel
• Implemented bandwidth management system for Palmetto Village Housing
• Installed 802.11 ABG wireless networking across North and South campuses, including housing
• Created Metro Ethernet links to Pineland Station and Beaufort Marine Corp Air Station to provide to provide seamless connectivity to our network
• Enhanced Quality of Service link between North and South campuses virtually eliminating network traffic issues for IVC classrooms
• Participated in Center for Excellence in Collaborative Learning(CECL) project which installed technology in rural Hampton County

Achievements in the Student Development Unit
• Established Judicial/Housing Office
• Hired Assistant Vice Chancellor for Student Development to oversee Judicial/Housing Office
• Doubled capacity of student housing
• Expanded and enhanced Student Life Programs in collaboration with Athletics, Housing, Opportunity Scholars Program, and the Student Government Association
• Established plan for mandatory orientation for first year students
• Expanded enrollment management plan to review enrollment and retention
• Implemented new outreach program called USCB Future Scholars
• Established a College Awareness program in partnership with the SC CHE and the Beaufort County Public School District
• Implemented the new Opportunity Scholars Program
• Held reception for graduates and their parents
• Received a portion of Pathways to Success Blank Family Foundation Grant
• Developed and implemented a comprehensive Student Orientation Program that included an overnight stay option
• Expanded recruitment activities to include state, regional and national venues
• Created and maintained an Admission’s Office’s prospect to yield database that reported a 72% yield rate for Fall 2006
• Student organizations on campus increased by one third
• Revised Student Handbook

3. Key strategic goals for the present and future years.
   • Strengthen and expand academic offerings
   • Expand and strengthen academic and student support services
   • Expand and diversify the student population
   • Support scholarship and the pedagogy of the faculty
   • Provide an environment conducive to teaching and learning
   • Broaden community awareness and support
   • Develop appropriate partnerships that support the University’s mission
   • Evaluate annually progress toward attaining its goals, objectives, strategies, and tactics
   • Strengthen planning, budget and assessment
   • Attain appropriate accreditations
   • Expand and strengthen recreation and varsity athletics
   • Develop new Strategic Plan for 2009-2013

4. Opportunities and barriers that may affect the organization’s success in fulfilling its mission and achieving its strategic goals:
   
   Strengths
   • Addition of new qualified permanent and tenure track faculty to support academic programs.
   • Potential for considerable growth
   • Improved technological infrastructure
   • Expanded contemporary facilities at the South Campus offers
   • USCB’s strong liberal arts tradition
   • Recent success in identifying and obtaining new grants
   • In-state tuition for three counties in GA
   • Lowest tuition rates among public, four year institutions in South Carolina
   • Desirable coastal location
   • Strong community and regional support
   • Excellence in teaching
   • Many dedicated and highly qualified faculty and staff members
   • Support of the institution’s leadership and for our shared vision of USCB’s future
• Appointment of a new EVCAA who is exceptionally qualified to lead our institution forward academically
• Student housing

Opportunities
• Improved communications between the campuses
• New image and facilities at South Campus
• Opportunity to reengineer our structure and function
• New degree programs and expanded recruitment efforts
• Ability to truly impact social promotion and advancement through educational efforts
• Regional population growth
• Opportunity to develop strong partnerships with local and regional entities
• Hired artist in residence to leverage the Lowcountry’s strong history and arts presence in Beaufort
• Opportunity to embrace our vision of becoming a quality baccalaureate degree-granting institution

Barriers
The need for:
• improved internal and external communications
• adequate state financial support
• improved course scheduling procedures
• more effective integration of Pritchards Island into our academic mission
• more continuity in policies and procedures
• strengthened administrative processes
• improved quality and quantity of faculty research
• some of our faculty and staff to challenge the status quo
• finances and funding for athletics fields and equipment
• the addition of a new student center

5. How the accountability report is used to improve organizational performance.
The Accountability Report serves as a self-assessment and internal review that USCB uses to document its effectiveness in achieving its mission and its compliance with the SC Commission on Higher Education (CHE), the Southern Association of Colleges and Schools (SACS), and other external accreditation agencies. The Accountability Report is aligned with the annual strategic planning process and institutional effectiveness framework and is used to document continuous improvement in teaching, student learning and student satisfaction. Annual assessment is a valuable tool in measuring progress, charting growth and identifying strengths and weakness that will result in the overall improvement of programs and services.
Section II - Organizational Profile

Description of the organization.
USCB is the state’s newest four-year University offering degree programs at two campuses in our region. USCB is comprised of two full-service campuses: the Historic Beaufort Campus (North) and the Gateway to Hilton Head (South). The South Campus has on-campus student apartments. Both campuses offer undergraduate programs of study to some 1500 students. In addition, the college offers AA/AS degrees only to military personnel and dependents at the Marine Corps Air Station Beaufort and Parris Island Marine Recruit Depot.

1. The organization’s main educational programs, offerings and services and the primary methods by which these are delivered.
Educational programs, offerings and services are offered through the seven academic and support units that make up the University: Academic Affairs, Advancement, Athletics Department, Community Outreach, Finance & Operations, Information Technology, and Student Development. USCB offers 12 baccalaureate degrees in: Biology, Business, Early Childhood Education, English, History, Hospitality, Human Services, Liberal Studies, Liberal Studies with a concentration in Security Studies, Nursing, Psychology, and Spanish. Associate of Arts and Associate of Science degrees are offered at the military installations to active-duty military personnel and their family members. The programs are delivered via traditional in-class instruction, on-line, and through interactive video-conferencing. There are numerous opportunities open to students who wish to study in other countries. Correspondence courses are administered through USC Distance Education and Instructional Services.

USCB offers a wide variety of educational and support services through the following offices:
- Academic Affairs
- Admissions
- Advisement
- Athletics (intramural and intercollegiate) and Recreation
- Bookstore
- Bursar
- Campus Information Desk
- Center for Excellence in Collaborative Learning (CECL)
- Instructional Technology and Academic Resources
- Information Technology & Computer Services
- Financial Aid & Veteran’s Affairs
- Human Resources
- Institutional Effectiveness & Research
- Libraries
- Maintenance & Facilities
- Military Programs and Student Services
- Opportunities Scholars Program
- Palmetto Village Student Housing Community
- Pritchards Island
- Public Safety
- Recruitment
- Registrar
- Student Clubs and Organizations
- Student Government Association
- Student Judicial/ Housing
- Student Life and Orientation
- Student Success Center
  (Career Services/Disability Services, Testing Services)
- Visual Information Processing System (VIP)

A variety of services and educational opportunities are offered to the community through the following initiatives and partnerships:
- USCB-Penn Center At Risk Family Initiative
- Beaufort Regional Technology Center
- Center for Excellence in Collaborative Learning (CECL)
- Continuing Education
- Fall and Spring Campus Days
- Osher Lifelong Learning Institute
- Pathways to Success program
- Sea Pines – Continuing Medical Education (CME)
- USCB Festival Series
- USCB Future Scholars Program
- USCB College Awareness Program

2. Key students segments, stakeholder groups, market segments and their key requirements/expectations.
Students and stakeholders expect quality academic programs and continuous improvement in the delivery of programs and support services.

**Key Student Segments:**
- On-campus students, including residents and commuter students
- Non-traditional students
- Area high schools in the Georgia/South Carolina service area
- Military Corp Recruit Depot at Parris Island and the Marine Corp Air Station
- Transfer students from the USC System, technical colleges, and other four year institutions
- Student Athletes
- Continuing Education students from the service area
- Three county Savannah metropolitan area
- South Carolina and Georgia
- Midwest and East Coast

**Stakeholder Groups:**
- Community residents
- Community partners, businesses and agencies
- Legislators
- Donors
- Taxpayers
- Students
- Local school districts
- Employers
- Alumni
- Chambers of Commerce
- Local Economic Development Boards

**Market Segments:**
- Beaufort, Hampton, Colleton and Jasper Counties in South Carolina
- Bryan, Chatham and Effingham Counties in Georgia
- Market segments have expanded out-of-state and out-of-country with the addition of student housing

3. Your operating locations
- North (Historic Beaufort) Campus
- South (Gateway to Hilton Head Island) Campus
- Marine Corps Air Station
- Marine Corps Recruit Depot at Parris Island
- Pritchards Island

4. The number of employees you have segmented by faculty and staff or other appropriate categories
Note: “Faculty and staff” refers to your organization’s permanent, temporary and part-time personnel, as well as any contract employees supervised by your organization. Contract staff supervised by a contractor should be addressed in Category 6.

<table>
<thead>
<tr>
<th>Full-Time Employees</th>
<th>Part-Time Employees</th>
</tr>
</thead>
<tbody>
<tr>
<td>Faculty</td>
<td>Staff</td>
</tr>
<tr>
<td>56</td>
<td>66</td>
</tr>
</tbody>
</table>

Total employees for the 06-07 year = 260.

5. The regulatory environment under which your organization operates
- USC Board of Trustees
- South Carolina Commission on Higher Education (SC CHE)
- Southern Association of Colleges and Schools (SACS)
- Outside accrediting agencies including:
  a) National Council for Accreditation of Teacher Education (NCATE)
  b) Association to Advance Collegiate Schools of Business (AACSB)
  c) Council on Standards in Human Services Education (CSHSE)
  d) SC Board of Nursing
  e) Collegiate Commission on Nursing Education (CCNE) which is the accrediting arm of the American Association of the Colleges of Nursing (AACN)
6. Your governance system

**Governing Board**
The University of South Carolina Beaufort is governed by the Board of Trustees of the University of South Carolina. The Chancellor is the Chief Administrative Office and reports directly to the President of USC. The President reports directly to the Board of Trustees. Senior administrative leadership reports directly to the Chancellor of USCB.

**Procedure for Development and Approval of Academic Policy and Practice at USCB**
The USCB Faculty Manual was approved by the USCB Faculty Senate on April 13, 2007, USC President Sorensen on July 27, 2007, and the USC Board of Trustees on August 10, 2007. The policies and practices therein are being implemented in the new academic year. As outlined under the Preamble/Faculty Powers, the faculty, subject to review by the Chancellor, President, and Board of Trustees, has decision-making powers in all matters pertaining to standards of admission, registration, requirements for and the granting of earned degrees, curriculum, instruction, research, extracurricular activities, discipline of students, educational policies and standards of the University, and all other matters pertaining to conduct of faculty affairs, including discipline of their own members. Initiatives are introduced at the committee level and to the Faculty Senate and once approved, forwarded to the Chancellor for consideration.

7. Your key suppliers and partners

**Key suppliers:**
- Local high schools in the three surrounding counties in GA and four surrounding counties in SC
- High schools in GA, SC, Midwest and east coast
- Local middle schools
- Community residents from the service area
- Community residents from Bryan, Chatham and Effingham counties in Georgia
- Active duty military and their family members
- Technical College System
- USC System
- Other four year colleges
- Parents and family members

The University seeks to develop partnerships where its resources can assist and support external groups in achieving their goals and where the educational and community mission of USCB can be enhanced by serving the public, making University resources available to the community at large. In addition to addressing the general education needs of the community, the office of Community Outreach focuses on the unique issues of the Lowcountry region, including economic enhancement, development activities, a growing retirement population, and preservation of the history and ecology of the area. Currently USCB has a number of partnerships including the Reconstruction Heritage Committee comprised of Penn Center, Beaufort County, Beaufort City, the Center of Excellence for Collaborative Learning (CECL) and a number of other groups working to establish a Reconstruction Historical National Area; ACE Basin and Baruch Institute to explore funding and mutual projects for coastal ecology; Sea Pines resort to develop a Sea Pines Academy to offer a variety of educational programs at their property; and a number of government, business, and civic organizations. USCB frequently
sponsors lectures, concerts, and theatre performances that are open to the public. Last year the special lecture series was a partnership with the Osher Lifelong Learning Institute at USCB.

**Other USCB Partners and Affiliations include:**
- Local social service agencies
- Local area school districts
- Local organizations and agencies
- Business and industry partners from the private and public sector
- Hospitals
- Local employers
- Non-profit agencies and organizations
- USCB - Penn Center Partnership
- USCB Future Scholars
- College Awareness Program
- Community Technology Centers
- Center of Excellence in Collaborative Learning
- Pathways to Success Program
- Osher Lifelong Learning Institute at USCB
- Jasper County/USCB Comprehensive School Reform Partnership Final Report

8. **Key competitors that directly compete for the same type of studies, research, and grants**
   - Other colleges and universities in the service area and the state

9. **Principal factors that determine your competitive success. The key changes that are taking place that significantly impact your competitive situation**
   Until three years ago, Lowcountry residents had to travel more than 70 miles to attend a four-year baccalaureate degree-granting institution in the state of South Carolina. In 2004, USCB became the only baccalaureate degree-granting institution in the southeastern tier of South Carolina. The addition of two new degree program in 2006-2007, four new degree programs in academic year 2005-06 combined with the six baccalaureate degree programs already established gave greater opportunity for Lowcountry residents to live and go to school in the USCB service area rather than moving away to attend a four-year institution, thereby increasing an educated workforce in the Lowcountry. In addition to acquiring four-year status, USCB is technologically driven to be competitive with other institutions by offering courses via distance education delivery. USCB maintains the lowest tuition among public, four year institutions in SC.

10. **Your key strategic challenges**
    - Hire new faculty to support, strengthen and expand academic offerings
    - Expand and strengthen student support services and athletics
    - Provide an environment conducive to teaching and learning
    - Increase awareness and build reputation of USCB in new markets-GA, SC statewide, Mid-West and East Coast.

11. **Your performance improvement systems**
    - Employee Performance Management System (EPMS)
    - Faculty Evaluations
Following are some key points from the document:

- Course Evaluations
- Institutional Effectiveness and Outcomes Assessment Annual Reports
- Institutional Effectiveness and Strategic Planning Framework/Process
- Internal Academic and Support Services Program Reviews
- Institutional Effectiveness Annual Report to the SC CHE
- Academic Program Curriculum Evaluation by the USCB Curriculum Committee
- SC State Budget and Control Board Annual Accountability Report
- USCB Core Service Values Training for faculty, staff and student workers

Category 1 - Senior Leadership, Governance, and Social Responsibility

1. How do senior leaders develop and deploy their organization’s vision and values throughout the leadership system, to all faculty and staff, to key suppliers and partners, and to students and stakeholders, as appropriate? How do their personal actions reflect a commitment to the organizational values?

Strong leadership is vital as USCB strives for continuous improvement in academic programs, student support services, and improved customer satisfaction. The leadership at USCB has established the Core Values of Integrity, Collaboration, Innovation, Responsiveness, Accountability and Excellence that the faculty organization has approved and the University family has embraced. The Chancellor and Administrative Council (Senior Leadership) model these Core Values to faculty and staff daily in their personal and professional actions, and in turn articulate them to their units as standards by which all academic and support services staff will function as they uphold and carry out the goals and mission of the University. Under the leadership of the Chancellor and the Administrative Council, University policy, procedures, direction, and other issues are developed and reviewed on a weekly basis. Information from the Chancellor and Administrative Council is delivered to faculty, staff, suppliers, partners and stakeholders in a number of ways:

- The Chancellor and Administrative Council meet weekly and the Chancellor sends the University Weekly Update, to all faculty and staff immediately following the meetings.
- The Chancellor’s Cabinet is a vital mechanism by which information is communicated from administration to the faculty, staff and student body. The Cabinet meets monthly.
- The President of the Student Government Association (SGA) is a member of the Chancellor’s Cabinet and communicates information from administration to the student body and addresses student concerns with the administration.
- Chancellor and Administrative Council are actively involved in community organizations and share information with community and stakeholders at a number of venues.
- Forums are held regularly with the student body at both campuses.
- Forums are held with the USCB’s Employees Association of Classified and Non-Classified (BEACON) staff organization.
- Chancellor writes a column in The Shrimp, a bi-weekly student newspaper.
- Chancellor and the EVCAA report to the Faculty Organization at regularly scheduled meetings.
- Chancellor reports annually to Beaufort and Jasper County Councils.
- Chancellor reports bi-monthly to the Beaufort/Jasper Higher Education Commission.
- Chancellor reports monthly to the USC President.
- Annual report published at the end of each fiscal year and mailed to key stakeholders.
- Semi-annual magazine mailed to key stakeholders.

2. How do senior leaders create a focus on action to accomplish the organization’s objectives, improve performance, and attain your vision?

USCB engages in ongoing, integrated, and institution-wide research-based planning and evaluation processes that incorporate a systematic review of programs and services that (a) result in continuing improvement and (b) demonstrate that the institution is effectively accomplishing its mission. Senior leaders take an active role in strategic planning and institutional effectiveness
initiatives and communicate the institution’s mission, vision, values goals, and objectives to staff, via face-face meetings, discussions with subunit heads and staff, through written guidelines and policies, through faculty and staff annual evaluations, student evaluations of courses and teaching effectiveness, internal and external satisfaction surveys to stakeholders and constituents, and through the development of effective training programs provided by the Human Resources office. Performance measures are set as part of the individual staff members’ EPMS planning stages. Unit heads monitor and evaluate these measures for individual employees through a review process for actual performance and recommendations. Consistent with the USCB mission of striving for continuous improvement in student learning and improving student satisfaction, all academic and support units and subunits draft annual Institutional Effectiveness and Outcomes Assessment (IE-OA) Reports that are used to articulate their purposes, goals, objectives and action plans for the coming academic year. The reports are reviewed by the Institutional Effectiveness Council (IEC) and a final report is sent to the Chancellor, Administrative Council, and Budget Committee for their review.

3. How do senior leaders promote and support an environment that fosters and requires: legal and ethical behavior; and, fiscal, legal, and regulatory accountability? How are these monitored?

All unit/subunit heads are responsible for monitoring and maintaining legal and regulatory accountability in their respective University offices with regard to state and federal regulations and USC policy and procedures through continuous review of operations, by communicating regularly with the appropriate legal authorities and personnel from regulatory agencies, and by setting high standards for operations and accountability. Fiscal accountability is maintained by adherence to state and federal laws and measured through annual state and federal audits. The SC State Budget Office, State Legislature and Governor’s Office, and USC Budget Office provide oversight as the University budget is developed annually. The University provides data to the state and federal government in a timely manner relating to Performance Funding, IPEDS, CHEMIS, financial aid, and other data for accountability purposes.

Ethical behavior is maintained by adherence to The Carolina Creed. Choosing to join the USC community obligates each member to a code of civilized and ethical behavior. Students conform to The Carolina Creed, the USCB Academic Code of Conduct, and the Student Code of Conduct. Students of the University are expected to be honest and forthright in their academic endeavors. In addition, all USCB faculty and staff are held to the high standards of the USCB Core Values which includes the core value of Integrity. This year, a Judicial/Housing Office was established and an Assistant Vice Chancellor for Student Development was hired to oversee the Judicial/Housing subunit. All members of the University community are expected to use reasonable judgment in their daily campus life and to show due concern for the welfare and rights of others. Conduct rules, disciplinary penalties, and complete hearing procedures are contained in the Student Handbook.

4. How do senior leaders create an environment for faculty and staff learning?

Faculty and staff are encouraged to pursue professional development opportunities for personal and professional growth. All full-time employees earn one free course per semester and are encouraged to further their education. The Human Resources office offers a plethora of free seminars, workshops, and training programs in a variety of subject areas that are available to all employees. The administration plans faculty/staff development opportunities on campus
annually. Faculty are awarded release time to pursue research activities and funding is provided for professional development activities. Selection for course release is made by a criteria-based application process to the Faculty Development Committee. In addition, USCB senior leadership developed and conducted the USCB Core Service Values training workshop to further reinforce the high customer/student service standards that are expected of faculty, staff and administrators.

5. How do senior leaders promote and personally participate in succession planning and the development of future organizational leaders?
Senior leaders encourage employees to seek personal and professional growth opportunities that could lead to job enhancement and promotion. Employees are encouraged to join professional organizations relevant to their positions and to avail themselves of training opportunities that will assist them with career growth. A faculty mentoring program has been established for new faculty and employees are encouraged to attend conferences in their field for job improvement, professional development and career expansion. Coaching and mentoring are provided to new employees within their respective units while unit heads and supervisors provide a great deal of informal transfer of knowledge to their colleagues. The University has clear definitions of roles and responsibilities for each position available so that employees can review the job descriptions and prepare for advancement. Employees are encouraged to take University classes at no charge and earn advanced degrees while employed. Senior leaders serve as role models to all employees by belonging to organizations that help them do their jobs better while transferring newly gained knowledge back to their staff.

6. How do senior leaders communicate with, empower, and motivate all faculty and staff throughout the organization? How do senior leaders take an active role in faculty and staff reward and recognition processes to reinforce high performance throughout the organization?
The flow of communication begins with Senior Administration who are the team leaders for their units and communicates with faculty and staff by listening, reviewing, and responding to feedback at departmental meetings and in committee meetings. The feedback is used to meet the needs expressed by faculty and staff for continuous improvement in programs and services. Faculty and staff are encouraged to take an active role in the decision-making process by volunteering for University committees. An awards ceremony, presided over by the Chancellor and EVCAA that recognizes the accomplishments of faculty and students, is held annually. Faculty and staff are eligible for annual Pay for Performance increases that are tied directly to annual performance appraisals which include areas that need improvement and specific steps for improvement. USCB strives to publicly acknowledge the achievements of faculty, staff and students by recognizing them in University and community public relations mediums.

7. How does your organization evaluate the performance of your senior leaders and the governance board/policy making body? How do senior leaders use these performance reviews to improve their own leadership effectiveness and that of the board and leadership system, as appropriate?
In order for USCB to demonstrate its overall effectiveness, administrators, including the chief executive officer, are periodically evaluated regarding their achievement of performance objectives that in turn are linked to institutional effectiveness measures. Regular evaluations contribute to the continuing development of the institution. This past year, Senior Administration were evaluated by faculty, staff and peers using the Administrator 360 evaluation. The survey
was administered through Flashlight, an online software tool. The results of the surveys will be shared with the administration and used to improve administrator effectiveness in the performance areas. The Chancellor is evaluated by the USC President and USC Board of Trustees annually.

8. How does your organization address and anticipate any adverse impacts of its programs, offerings, services and operations? What are the key compliance related processes, goals, and measures? (Actual results should be reported in Category 7).

USCB strives for continuous improvement in its academic programs and support services and takes a pro-active approach by anticipating problems before they arise. Through assessment, USCB identifies problem areas so that improvements in programs and services can be made in order to offer the best educational experience possible. The office of IER coordinates institutional assessment activities. The Chancellor and senior administration rely on information provided to make data-driven decisions.

The IEC is responsible for overseeing general education assessment as well as reviewing the academic and support units’ assessment reports. Major assessment is done in concert with the University’s mission and strategic plan. Academic programs and services are reviewed by internal and external constituencies such as the SC CHE and SACS. USCB went through a comprehensive self-study and received four-year baccalaureate degree-granting status from SACS in 2004. The University is currently preparing for its SACS Reaffirmation 2009 review. In addition, USCB is seeking voluntary external accreditation for several of its academic programs as the institution continues its commitment to excellence (NCATE, CSHSE and AACSB, the SC Board of Nursing and the CCNE).

Student participation in assessment activities is a University priority. After the close of each semester and summer, students complete a course evaluation and an exit survey upon graduation. Focus groups are held with students to discuss the strengths and weaknesses of programs and services so that action plans for improvement can be developed. The SGA represents the student body and plays an important role in institutional decision-making and addressing student concerns. The President of the SGA is appointed to several University committees including the Chancellor’s Cabinet and the Institutional Effectiveness Council and brings concerns about programs, services and operations directly to the administration.

The University seeks input from community partners and stakeholders in order to gain knowledge on strengths and weaknesses. We seek input from the local schools, businesses, industry, hospitals, social services agencies, private and non-profit sector, and other community partners to ensure program effectiveness. An advisory board, made up of community members and partners, has been established for each academic program. Surveys given to community partners to gauge the effectiveness of programs, operations and services include internship surveys, employer surveys and alumni surveys.

9. How do senior leaders actively support and strengthen the community in which your organization operates? Include how leaders determine areas of emphasis for organizational involvement and support, and how senior leaders, faculty and staff, and the organization’s students contribute to improving these communities?
In keeping with the University mission of teaching, research, scholarship and public service, USCB has been responding to local needs by providing programs and services to the community since 1959. Senior administration, faculty, and staff are heavily involved in public service through volunteer efforts that impact the community in a positive way. Community involvement at the local, state and/or federal level is essential for all faculty and staff, not just senior administration. Faculty members are expected to contribute to the community at large in ways that make use of their professional expertise. The Beacon staff organization collectively determines which volunteer service activities the University staff will participate in each year. Over the past year those activities included the Relay for Life, Red Cross Blood Drive, AIDS Awareness, the United Way, Needy Families Drive during the holidays, Toys for Tots Drive, Thanksgiving Food Drive, and a Coat Drive. Students can join a number of organizations on campus, such as Gamma Beta Phi, which seek to disseminate and improve education through appropriate service activities. The Office of Community Partnerships supports USCB’s mission of serving the public by making University resources available to the community at large through a wide variety of outreach programs. Senior leadership determines areas of emphasis for organizational involvement and support through the University’s ongoing strategic planning and institutional effectiveness initiatives and communicates information to administration, faculty, staff and students via face-to-face meetings, committees, and weekly electronic updates. Senior leaders are involved in civic and service organizations, economic development initiatives, and local government task forces including:

- Local Rotary
- Greater Beaufort-Hilton Head Island Economic Development Partnership
- Literacy Volunteers of the Lowcountry
- Beaufort County Mayor’s Task Force
- Greater Beaufort Regional Chamber of Commerce
- American Association of University Women
- Governing Board, Hilton Head Island/Bluffton Chamber of Commerce (current Chairperson)
- Governing Board, Coastal Business Education Technology Alliance (CBETA)
- Governing Board, Hilton Head Regional Medical Center
- Governing Board, Greater Beaufort-Hilton Head Island Economic Development Partnership
- Ex-Officio Member, Beaufort Chamber of Commerce, Board of Directors
- Board of Directors, Coastal Carolina Medical Center
- Board of Trustees, Community Foundation of the Lowcountry
- Arthur M. Blank Family Foundation, Pathways to Success National Advisory Committee.
- Hilton Head Island Greater Island Committee
- Pathways to Success Advisory/Steering Committee, Bluffton High School
- Hilton Head Area Hospitality Association
- Bluffton Technology Park Workforce Taskforce
- Hilton Head Island/Bluffton Chamber of Commerce
- Main Street Beaufort
- Low Country Regional Education Center

</table>
1. What is your Strategic Planning process, including key participants, and how does it address:

   a) Your organizations’ strengths, weaknesses, opportunities and threats;

USCB has engaged in systematic, University-wide strategic planning for many years. The strategic planning cycle is five years with annual updates. Strategic planning involves input from all members of the USCB community and a wide representation of external stakeholders. Ongoing and systematic assessment is vital to the University’s continuous improvement initiatives, and is critical in demonstrating the quality of the institution to the community and to external agents such as SACS and CHE.

The University has implemented an institutional effectiveness cycle which has a series of activities and a timeline to ensure a continuous planning process and a feedback loop in regard to the desired outcomes of its educational programs and its administrative and educational support services that provides for continuous improvement. Annually the IEC reviews assessment data in relation to defined outcomes to determine progress, to identify changes that must be considered for the upcoming year, and to make recommendations, including those with budget implications, to the Chancellor of the University. The results of an institutional analysis, including the strengths, weaknesses, opportunities and threats, are identified and discussed at an annual planning retreat of the Administrative Council. The results of the analysis form the basis for the development and revision of the strategic goals and objectives of the University.

USCB uses a three-tiered approach to comprehensively review institutional effectiveness initiatives. The IEC (formerly Planning Council) was integrated into the current model for institutional effectiveness and strategic planning. The IEC’s function is to review, monitor, and revise the Institutional Effectiveness and Strategic Planning Framework/Process, processes and procedures of the University. Professional development sessions were held for the academic and support units that focused on expanding the use of assessment to facilitate continuous improvement and on developing outcomes and criteria for measuring progress in attaining them. Planning meetings focused on how to accelerate the shift to strategic thinking so that campus-wide processes, structures, and human financial resources are aligned to facilitate performance in priority areas. These cumulative analyses formed the foundation of the strategic planning process and resulted in the development of the USCB 2003-2008 Strategic Plan. A new planning cycle for the 2009-2013 Strategic Plan will commence in January 2008.

USCB’s planning and assessment process is broad-based, systematic, and appropriate to the institution. The process itself has been evaluated as the University prepared for separate accreditation as a four-year institution. With input from all units of the University, the process continues to evolve with the primary goal of serving students in the region of the Lowcountry by continuously improving its educational programs and support services.

   b) Financial, regulatory, and other potential risks;

Cost benefit analyses are reviewed for each proposed objective. University strengths and weaknesses are identified. An external analysis, to include factors and impact, is included in the plan to address increases in tuition and fees. USCB will further refine its process to include peer institutions to maintain what we believe is our competitive advantage. Strategic planning
objectives are aligned with the University’s performance outcome measures and state and federal regulations.

Human resource capabilities and needs: Staffing patterns are analyzed to ensure objective workforce training and succession planning is accomplished. Staff realignment and resources are prioritized to meet the needs of the institution.

Operational capabilities and needs: Fiscal data to include the projected annual budget in addition to staffing patterns and available resources are discussed. Organizational capacity is analyzed and expanded as appropriate to meet the agency’s mission.

c) Shifts in technology, student and community demographics, markets, and competition;
Shifts in technology, student and community demographics, markets, and competition are addressed in 8 of the 10 University Strategic Plan Goals. Shifts in technology are based on the demands of students who come to the University expecting to use up-to-date technology in the classroom. There is on-going training for faculty in instructional technology to improve teaching methodology. A system called Tegrity is being used to give students and faculty more control and access to course lectures using multiple sources such as computers, PDAs, iPods, and cell phones.

USCB has established The Center for Instructional Technology and Academic Resources in order to provide an environment of collaborative learning that builds on students’ experiences in the classroom. The center also houses a writing center, mathematics labs, and tutoring services.

USCB uses census data and conducts long-term studies to identify student demographics and market segments. The IER office conducts a number of internal and external surveys such as the Graduating Student and Alumni surveys, National Survey of Student Engagement (NSSE) and the Faculty Survey of Student Engagement (FSSE) to gather information on student and community satisfaction.

USCB gathers information about availability of its newly established four-year degree programs out in the market to “prove” the model that was proposed when the institution was granted four-year degree status. It is doing so in local markets that are undergoing rapid population growth. For example, the community surrounding the South Campus location doubled in population between 2000 and 2004. With the retiring of the baby boomer generation, this level of growth—and shift toward a growing older demographic segment—is expected to accelerate. At the same time, the area is beginning to attract knowledge-based businesses run by “thirty-something” entrepreneurs as well as a large population of people who host tourism and the service industries supporting the elderly. As a result, local school systems are overflowing with students who will need a local higher education source.

In addition to rapid growth in the four county South Carolina areas that USCB served as a 2-year institution and still serves today, the university is reaching into the nearby Savannah metropolitan area to attract both undergraduate and extended graduate campus students. This new market offers much potential as Savannah is experiencing rapid population growth,
particularly in areas such as Effingham and Bryan Counties, from which USCB is more accessible than most of its equivalent Georgia institutions.

Lastly, USCB is tapping new markets, particularly in the Midwest and East Coast. Using data collected by USCB and by Hilton Head tourism watchers, USCB is finding that states and communities where Hilton Head Island is well known are open and interested in learning more about university options in this section of the Lowcountry. As our communications and recruiting program expands, we expect to find strong growth in this market segment.

Ironically, one of USCB’s most challenging markets is local place-bound students. Local high schools have some of the lowest graduation rates in the United States and the rate of baccalaureate attainment among the local, indigenous population is extremely low. USCB is actively developing new models to encourage local students to aspire to earn a baccalaureate degree and to take the course work needed to enable them to enter four-year degree programs upon graduation.

d) Human resource capabilities and needs
Currently, USCB has implemented a three year budget process to help identify needed positions. The planning process has been essential identifying the areas of projected growth. Human resources must ensure that we meet the policies of the university which include a diverse and equal pool of talent. Current Equal Employment Opportunity goals have been attained which allows for a diverse workforce.

e) The opportunities and barriers you described in the Executive Summary, (question 4)
The strategic challenges are identified and addressed using the USCB annual, four-phase Institutional Effectiveness and Strategic Planning Framework/Process. Phase I consists of a University-wide analysis and input by all areas of the University through responses to surveys and/or questionnaires or by other means (SWOT Analysis) from the IEC. The Director of Institutional Effectiveness and Research compiles and analyzes the data from the University-wide input and presents the information to the IEC and the Chancellor at the annual Administrative Council Retreat. Senior leadership determines areas of emphasis for organizational involvement and support through the University’s ongoing strategic planning and institutional effectiveness initiatives and communicates information to administration, faculty, staff and students via face to face meetings, committees, and weekly electronic updates. Extensive discussions center on how best to address a variety of issues and on developing appropriate strategies and objectives to advance the institution. The outcomes of the discussion form the framework for developing our current strategic plan strategies and tactics and the unit plans in each of our key performance/functional areas to accomplish our goals and objectives.

USCB has engaged in systematic, University-wide strategic planning for many years. The strategic planning cycle is five years with annual updates. Strategic planning involves input from all members of the USCB community and a wide representation of external stakeholders. The University has implemented an institutional effectiveness cycle which has a series of activities and a timeline to ensure a continuous planning process and a feedback loop in regard to the desired outcomes of its educational programs and its administrative and educational support services that provides for continuous improvement. Annually the IEC reviews assessment data in
relation to defined outcomes to determine progress, to identify changes that must be considered for the upcoming year, and to make recommendations, including those with budget implications, to the Chancellor of the University. The results of an institutional analysis, including the strengths, weaknesses, opportunities and threats, are identified and discussed at an annual planning retreat of the Administrative Council. The results of the analysis form the basis for the development and revision of the strategic goals and objectives of the University.

USCB uses a three-tiered approach to comprehensively review institutional effectiveness initiatives. The IEC (formerly Planning Council) was integrated into the current model for institutional effectiveness and strategic planning. The IEC’s function is to review, monitor, and revise the Institutional Effectiveness and Strategic Planning Framework/Process, processes and procedures of the University. Professional development sessions were held for the academic and support units that focused on expanding the use of assessment to facilitate continuous improvement and on developing outcomes and criteria for measuring progress in attaining them. Planning meetings focused on how to accelerate the shift to strategic thinking so that campus-wide processes, structures, and human financial resources are aligned to facilitate performance in priority areas. These cumulative analyses formed the foundation of the strategic planning process and resulted in the development of the USCB 2003-08 Strategic Plan.

USCB’s planning and assessment process is broad-based, systematic, and appropriate to the institution. The process itself is evaluated by the IEC on an annual basis and recommendations for change are submitted to the Chancellor for consideration. With input from all units of the University, the process continues to evolve with the primary goal of serving students in the region of the Lowcountry by continuously improving its educational programs and support services.

(f) Long-term organizational sustainability and organizational continuity in emergencies
USCB takes a proactive approach rather than reactive one and has developed a five-year strategic plan, 2003-2008. All units in conjunction with the IEC annually review the 2003-2008 strategic plan to determine status of goals and objectives. A University-wide Strategic Planning Committee will begin drafting the 2009-2014 university strategic plan following the aforementioned process to ensure continuity and stability.

(g) Your ability to execute the strategic plan
USCB achieves its mission and goals using a four-phase Institutional Effectiveness and Strategic Planning Framework/Process.

USCB Institutional Effectiveness and Strategic Planning Framework/Process
Phase I: Analysis and Input Process
- There is University-wide analysis and input by all areas of the University through responses to surveys and/or questionnaires or by other means (SWOT Analysis).
- Key performance areas (Academic Affairs, Advancement, Athletics Department, Community Outreach, Finance and Operations, and Student Development) analyze and/or identify:
  - The strengths and weaknesses of the internal environment of the University that includes organizational performance and organizational design;
The political, economic, sociological, and technological forces of the external environment;
The stakeholders of the University;
The University’s competition; and
Resources of the University.

- The Director of Institutional Effectiveness and Research compiles and analyzes the data from the University-wide input.
- The Administrative Council Retreat is held to discuss results of the data analysis.

**Phase II: University-Wide Plan**
- Strategic goals and objectives are developed and/or revised for the USCB Strategic Plan.

**Phase III: Unit Plans and Institutional Effectiveness and Outcomes Assessment Plans**
- Unit Plans to accomplish the Strategic Plan are written by the key performance areas: Academic Affairs, Advancement, Athletics Department, Community Outreach, Finance and Operations, and Student Development.
- The Chancellor reviews the Enabling/Unit Plans
- Educational Programs and Administrative Support Services develop Institutional Effectiveness and Outcomes Assessment Plans that include intended outcomes, assessment strategies, measures, and criteria.
- Academic Program Reviews are conducted according to schedule.

**Phase IV: Plan Implementation and Evaluation of Progress**
- Institutional Effectiveness Plans are implemented.
- The Institutional Effectiveness Council reviews the results of the Institutional Effectiveness Plans and Outcomes Assessment Reports and the results of the Academic Program Review(s).
- The Institutional Effectiveness Council makes recommendations regarding the results of the Institutional Effectiveness Plans and Outcomes Assessment Reports and submits them to the Chancellor who then submits those with budget implications to the Budget Committee.
- The Institutional Effectiveness Council makes recommendations regarding Academic Program Review and submits them to the chair of the Academic Program Review Committee.

A flowchart illustrating the USCB Institutional Effectiveness and Strategic Planning Framework/Process is located on the following pages.
2. How do your strategic objectives address the strategic challenges you identified in your Organizational Profile? (Section II, question 10)

The key strategic goals identified in the institutional analysis are actions to be taken and intended to lead to the improvement of the academic programs and support services of the University. They are listed in the Strategic Plan and are used to develop unit plans and the IE-OA Reports. The Strategic Plan 2003-2008 demonstrates the solid ground on which the institution stands because of planning and using the results of evaluation to achieve the mission and goals of the University. The key strategic goals are to:

1. Strengthen and expand academic offerings
2. Expand and strengthen academic and student support services
3. Expand and diversify the student population
4. Support scholarship and the pedagogy of the faculty
5. Provide an environment conducive to teaching and learning
6. Broaden community awareness and support
7. Develop appropriate partnerships that support the University’s mission
8. Evaluate annually the University’s progress toward attaining its goals, objectives, strategies and tactics
9. Strengthen planning, budget and assessment
10. Attain appropriate accreditations

The strategic challenges are identified and addressed using the USCB annual, four-phase Institutional Effectiveness and Strategic Planning Framework/Process. Phase I consists of a University-wide analysis and input by all areas of the University through responses to surveys and/or questionnaires or by other means (SWOT Analysis) from the IEC. The Director of Institutional Effectiveness and Research compiles and analyzes the data from the University-wide input and presents the information to the IEC and the Chancellor at the annual Administrative Council Retreat. Senior leadership determines areas of emphasis for organizational involvement and support through the University’s ongoing strategic planning and institutional effectiveness initiatives and communicates information to administration, faculty, staff and students via face to face meetings, committees, and weekly electronic updates. Extensive discussions center on how best to address a variety of issues and on developing appropriate strategies and objectives to advance the institution. The outcomes of the discussion form the framework for developing our current strategic plan strategies and tactics and the unit plans in each of our key performance/functional areas to accomplish our goals and objectives.

The University has implemented an institutional effectiveness cycle which has a series of activities and a timeline to ensure a continuous planning process and a feedback loop in regard to the desired outcomes of its educational programs and its administrative and educational support services. Annually the IEC reviews assessment data in relation to defined outcomes to determine progress, to identify changes that must be considered for the upcoming year, and to make recommendations, including those with budget implications, to the Chancellor of the University. The results of an institutional analysis, including the strengths, weaknesses, opportunities and threats of the University, are identified and discussed at an annual planning retreat of the Administrative Council. The results of the analysis form the basis for the development and revision of the strategic goals and objectives of the University.

3. How do you evaluate and improve your strategic planning process?
Responsibility for planning and evaluation is a shared responsibility at USCB. USCB engages in ongoing, integrated, and institution-wide research-based planning and evaluation processes that incorporate a systematic review of programs and services that (a) results in continuing improvement, and (b) demonstrates that the institution is effectively accomplishing its mission. To ensure efficacy, USCB employs a Director of Institutional Effectiveness and Research to facilitate the leadership of planning and assessment initiatives. In this capacity, the individual works with administration, faculty, and staff in coordinating the continuous improvement initiatives across campus. The Director works with the IEC to evaluate the Institutional Effectiveness and Strategic Planning Framework/Process, process, and procedures of the University. The strategic planning process is reviewed annually by the IEC. Recommendations of their findings are compiled into a report and presented to the Chancellor, Administrative Council, and Budget Committee for their review and action if necessary.
4. How do you develop and track action plans that address your key strategic objectives? Include how you allocate resources to ensure the accomplishment of your action plans.

Key action plans/initiatives are identified in the Institutional Analysis of Phase I or by key performance areas in and of themselves. They are actions to be taken and intended to lead to the improvement of the educational programs and support services of the University. They are listed in the University Strategic Plan, and the unit plans and are used to develop annual Institutional Effectiveness and Outcomes Assessment reports. All of the University’s goals and objectives are geared toward the achievement of the mission of the University.

The IEC evaluates the Institutional Effectiveness and Strategic Planning Framework/Process, and procedures of the University. The Institutional Effectiveness Plan and Process is an ongoing, comprehensive, broad-based and institutionally integrated system for planning and evaluation designed to enhance and improve the institution, as well as demonstrate to what degree the institution has been effective in fulfilling or achieving its stated mission and goals. It involves a process of continually reviewing and articulating the mission and goals of the University, setting intended/expected outcomes (results), assessing these results, analyzing the data from the assessment, and using the results for improving academic programs and services.

The unit head oversees the development of unit plans and annual IE-OA Reports within their units. The action plans, known as Institutional Effectiveness and Outcomes Assessment (IE-OA) Reports address the University’s mission and goals, and the unit head’s expectations for improvements in their areas. These plans are monitored throughout the year and allocations of resources are based on data driven assessment. The IEC monitors the action plans and makes recommendations regarding the results of the IE-OA Reports to the Chancellor who then submits those with budget implications to the Budget Committee.

5. How do you communicate and deploy your strategic objectives, action plans and related performance measures?

USCB achieves its mission, goals, objectives, action plans and other performance measures using a four-phase Institutional Effectiveness and Strategic Planning Framework/Process. The IEC communicates on an on-going basis the institutional effectiveness and strategic planning process, procedures, and findings to the educational programs, academic divisions and to the administrative and educational support services units through minutes, reports, and direct contact of members with their respective divisions. The IEC reports after every scheduled meeting the findings of the IEC to the Chancellor of the University and to the Chancellor’s Administrative Council and/or the Chancellor’s Cabinet. The IEC prepares an annual report of the work of the IEC.

6. How do you measure progress on your action plans?

The IEC monitors the action plans that address the key objectives. The office of Institutional Effectiveness and Research identifies, collects, and interprets the data (quantitative and qualitative) from the unit plans to determine the extent to which intended outcomes (expected results) are actually achieved. The IER office compiles and presents a report to the IEC for their review. A final report along with budget implications is presented to the Chancellor and Administrative Council. The IER office also compiles and submits an Institutional Effectiveness Report to the CHE annually.
7. The agency’s internet homepage address to access the strategic plan.

Category 3 - Student, Stakeholder, and Market Focus

1. How do you identify the student and market segments your educational programs will address? How do you determine which student and market segments to pursue for current and future educational programs, offerings, and services?

USCB is the only four-year baccalaureate degree-granting institution in the southeastern corner of the state within a 70 mile radius. The rationale for providing specific programs is based on market analysis, needs assessment surveys, focus groups, market research, census data, surveys from high schools, feedback from advisory boards that make up a cross-section of the community and help determine program needs, student demand, and the success of existing curricula in the disciplines where courses have been previously offered by USCB.

USCB has identified its markets based on geographic proximity and affinity to Hilton Head Island. A three-pronged strategy for creating a diverse, lively campus by serving local residents of four counties in South Carolina, the metropolitan Savannah area, and east coast communities with strong links to Hilton Head Island, was established when the campus moved to four-year status in 2004. This model has been supported by the campuses’ ability to attract these three populations of students without an extensive or complete marketing program in place.

In August of 2006, a marketing-oriented Vice Chancellor for University Advancement was hired to assist in developing the research program. As a result, USCB began to develop the communication tools needed to reach these segments and beyond including some key literature pieces, a website and recruiting video on CD, and has gained some experience in media usage in Savannah and east coast markets. As this marketing capability grows, the research sophistication of the institution is now ready to develop. The Advancement Office has expanded into using direct mail and billboard advertising and plans a more complete suite of recruiting literature in 2007-08.

2. How do you keep your listening and learning methods current with changing student and stakeholder needs and expectations (including educational programs, offerings, and service features)? How do you determine the relative importance of the expectations to these groups’ decisions related to enrollment?

As USCB transitioned from a two-year to a four-year institution in 2004, the demand for programs and services from our stakeholders was extensive and clear. Direct communication is the most effective way to gauge academic interest and customer service and focus groups are regularly held with students and key stakeholders to gauge needs and interests. Our faculty and staff are tightly integrated with students and openly exchange ideas about how to move forward. Surveys are administered to students and stakeholders asking for input and suggestions on academic programs, distance education delivery methods, and student satisfaction. The challenge has been to grow quickly enough to serve them. Examples are the development of a Nursing Program that clearly fits current regional needs and strengths and the development of a Security Studies program that addresses our port growth and compliments the education of our military population while increasing use of technology to deliver the courses.
3. How do you use information from current, former, and future students and stakeholders to keep services and programs relevant, and provide for continuous improvement?

The Office of Advancement is in the process of establishing an alumni association that will help gather feedback from alumni. In addition, we developed an alumni magazine for the 06-07 academic year. We are working to coordinate feedback from academic and support areas to evaluate student satisfaction and needs. Graduation (exit) surveys, alumni surveys, advisement surveys, course evaluations, employer surveys, NSSE, and internship surveys are given by the IER office to gain information on programs and services. Each academic program has an advisory board that provides support and feedback on academic programs.

4. How do you determine student and stakeholder satisfaction and dissatisfaction and use this information to improve?

USCB is committed to continuous improvement in student learning, student satisfaction, and customer service. Results from graduation (exit) surveys, alumni surveys, advisement surveys, the NSSE survey, course evaluations, focus groups, customer service survey, employer surveys, and internship surveys are given by the IER office to gain information on programs and services. The results of the surveys are shared with staff and used to make improvements in the appropriate areas.

5. How do you build positive relationships to attract and retain students and stakeholders, to enhance student performance, and to meet and exceed their expectations for learning? Indicate any key distinctions between different student and stakeholder groups.

USCB responded to a broader spectrum of critical educational needs and interests of our citizens by becoming the region’s first baccalaureate degree-granting institution. Recognizing teaching as its primary function, USCB recruits and continuously develops highly qualified faculty members with current content knowledge, outstanding instructional skill, and a student-centered philosophy of education. Through its dedicated professional administration, faculty, and staff, we seek to provide a learning environment, which is technologically current, supportive of students with diverse interests and abilities, and dedicated to student success. On campus housing, Office of Student Life programs and athletics are available to students to further engage them outside of the classroom while also cultivating a strong sense of community within the University. USCB supports the USC extended graduate campus which offers over 22 graduate degrees to local residents. In addition specialized associate degree programs are offered to military personnel and their families. The institution also strongly supports the study and appreciation of the area’s unique geography, ecology, history and culture through the Pritchards Island Research Center for marine science and coastal ecology, and the Sea Islands Institute. As the region grows in population and complexity, USCB will become the primary resource for intellectual, social, cultural and economic life for students and stakeholders.

Note: “Educational programs, offerings, and service features” refers to key characteristics of programs, offerings, and services that are available throughout the period of time students attend your organization. This includes the period from the students’ initial decision to enroll in your organization through the time of their departure.
Category 4 - Measurement, Analysis, and Knowledge Management

1. How do you select which operations, processes and systems to measure to determine student learning, and for tracking organizational performance, including progress relative to strategic objectives and action plans?

In line with USCB’s Institutional Effectiveness and Strategic Planning Framework/Process, and USCB’s mission and goals, each academic and support unit identifies measures at the unit level. We have established evaluation and assessment methods designed to ascertain attainment of educational goals at both the institutional and academic program level. Each academic and support unit has a defined statement of purpose directly linked to USCB’s mission. Annual IE-OA Reports are developed for all academic and support units and are used to measure student learning outcomes and student satisfaction. USCB’s Strategic Plan integrates critical goals and objectives for all units campus-wide. The Chancellor, Administrative Council, Unit Heads, Enrollment Management Team, and IEC meet throughout the year to review performance results. The IER office provides training to assist internal groups with data collection and analysis of the performance measures.

Some of USCB’s processes are mandated by external state and federal entities such as the state of SC and the CHE, Title II and Title IV. As a state University, USCB is required to report annually on a range of indicators as part of the South Carolina’s performance-based funding model. This level of assessment provides a broad overview of how well the institution is meeting its mission and serving the state. The scorecard approach also allows for benchmark comparisons with other colleges and universities within South Carolina. Institutional effectiveness measures are also mandated by state law. All South Carolina colleges and universities must assess academic advising, library resources and services, student development, general education, technology competency, and majors and concentrations on a rotating annual basis. Each institution determines the tools and methodologies it will employ for this level of assessment. Preparing for the accreditation processes of SACS, NCATE, AACSB, and the CSHSE, SC Board of Nursing, and the CCNE & AACN is another means by which the University initiates self-studies that examine and track student learning, organizational performance, and allow us to measure progress relative to strategic objectives and action plans.

2. How do you use data/information analysis to provide effective support for decision making throughout your organization?

Ongoing and systematic assessment is vital to the University’s continuous improvement initiatives, and is critical in demonstrating the quality of the institution to the community and to external agents such as SACS and the SC CHE. The University has implemented an institutional effectiveness and planning cycle which has a series of activities and a timeline to ensure a continuous planning process and a feedback loop in regard to the desired outcomes of its educational programs and its administrative and educational support services. Annually the IEC reviews assessment data in relation to defined outcomes to determine progress, to identify changes that must be considered for the upcoming year, and to make recommendations, including those with budget implications, to the Chancellor of the University. The results of an institutional analysis, including the strengths, weaknesses, opportunities and threats of the University are identified and discussed at an annual planning retreat of the Administrative Council. The results of the analysis form the basis for the development and revision of the strategic goals and objectives of the University. The IER office provides data and reports to the
Administrative Council, Enrollment Management Team, Budget Committee, the IEC, and other committees on campus to be used as the basis for decision making. The various committees collect data and use the results to set policy or focus efforts for improvement of the University. Annual IE-OA Reports are used to make improvements in academic and support services. 

Note: Analysis includes trends, projections, comparisons, and cause-effect correlation intended to support performance reviews and the setting of priorities for resource use. Analysis draws upon many types of data including student and stakeholder related requirements, operational, competitive, and others. (Results are reported in category 7).

3. What are your key measures, how do you review them, and how do you keep them current with educational service needs and directions?

The key measures are reviewed by various committees and councils within the University using the Institutional Effectiveness and Strategic Planning Process/Framework. Key measures are reviewed at different frequencies, annually, on a semester basis, and weekly, to keep them current with educational service needs and directions. For example, graduation rates are reviewed annually whereas enrollment data is reviewed weekly. The key measures are:

- Enrollment Statistics
- Program Graduates
- Retention/Attrition Data
- Graduation Rates
- University Enrollment
- Applicant Yield Rate
- Number Applying for Financial Aid
- Number Eligible for Title IV Funds
- Student/Customer Satisfaction
- Employment Rates
- Examinations and Certification Tests
- Number of Students in Post-Graduate Study
- Human Resources EPMS

4. How do you select and use key comparative data and information from within and outside the academic community to support operational and strategic decision making?

Comparative data and information are selected according to the goals of the Strategic Plan. The annual IE-OA Reports are used to assess goals and objectives for each unit and are the basis for the next year’s plan. Due to the newness of our four-year status, USCB is in the formative stages of establishing baseline data for each measure and will compare all results thereafter to the baseline. In Spring 2007, the NSSE and FSSE surveys were administered. The data will be analyzed and used as the University develops a quality enhancement plan as part of the SACS reaffirmation of accreditation process. Data is available on the CHE website for USCB and similar institutions statewide.

5. How do you ensure data integrity, timeliness, accuracy, security and availability for decision making?

To ensure efficacy and integrity of our measures, USCB conducts internal and external reviews. Other quality assurance procedures the University participates in are internal quality assurance audits, federal and state audits, electronic data collection, review of data by Administrative
Council, Unit Heads, the IEC, Enrollment Management Team, training in technology and data collection and annual reviews of data to analyze and support the institutional effectiveness and strategic planning cycle.

USCB protects the security, confidentiality and integrity of its records and maintains security measures to protect and back up data, follow standard confidentiality and security procedures such as firewalls, redundancy, password protection and other policies to ensure data integrity. Incremental backups are done on a daily basis for local data. USC Columbia maintains critical student data for the University. USC is working to implement an Enterprise Resource Planning system to replace the Legacy student information data system. One of the benefits of this change will be the removal of social security numbers as a primary identifier.

6. How do you translate organizational performance review findings into priorities for continuous improvement?

The overriding theme at USCB is continuous improvement in student learning and student satisfaction. Ongoing and systematic assessment is vital to the University’s continuous improvement initiatives, and is critical in demonstrating the quality of the institution to the community and to external agents such as SACS and CHE. The University has implemented an institutional effectiveness cycle which has a series of activities and a timeline to ensure a continuous planning process and a feedback loop in regard to the desired outcomes of its educational programs and its academic and educational support services. Annually the IEC reviews assessment data in relation to defined outcomes to determine progress, to identify changes that must be considered for the upcoming year, and to make recommendations, including those with budget implications, to the Chancellor of the University. The results of an institutional analysis whereby the strengths, weaknesses, opportunities and threats of the University are identified and discussed at an annual planning retreat of the Administrative Council. The results of the analysis form the basis for the development and revision of the strategic goals and objectives of the University.

7. How do you collect, transfer, and maintain organizational and employee knowledge (knowledge assets)? How do you identify and share best practices?

The Chancellor and Administrative Council meet weekly and transmit the information from these meetings to their units through face to face meetings with staff and through the University Weekly Update. Unit heads are responsible for disseminating the information and ensuring that new guidelines, policy and procedures, best practices are being followed to make day-to-day decisions by staff and directors. The USC system holds quarterly, system-wide meetings based on academic and support services units such as the registrar, admissions, institutional effectiveness, academic affairs, finance, University leaders’ council, student affairs and financial aid where best practices are shared among colleagues. Best practices are learned from faculty and staff attendance at professional associations and conferences and brought back to University staff through transfer of knowledge and cross-training workshops.

Category 5 - Faculty and Staff Focus

1. How do you organize and manage work to enable faculty and staff to develop and utilize their full potential, aligned with the organization’s objectives, strategies, and action plans
and promote cooperation, initiative, empowerment, innovation, and your organizational culture?

The university leadership team creates values and promotes consistent communication at all levels of the organization through: 1) emailed information concerning various issues, 2) annual Employee Performance Management System (EPMS) evaluation meetings, 3) and Employee Recognition Awards Ceremony Programs. These forums are created as a strategy to empower employees, build morale and facilitate communication by allowing employees to participate and provide feedback. They also allow for participation in the decision-making and strategic planning process of the agency. Managers should also encourage and motivate employees through the EPMS. The EPMS process is crucial in communicating, coaching and empowering employees to meet strategic priorities. This process serves as the foundation for planning work priorities, professional development, and evaluation of employee performance. The agency measures the Meets by Default rate on a monthly/annual basis and discusses the results with supervisors during monthly managers meetings. This measure provides senior managers a sense of the overall commitment that supervisors demonstrate with respect to employee development and the performance management process.

The flow of communication throughout the University begins with the Administrative Council, the team leaders for their units, who meet weekly and communicate with their faculty and staff by listening, reviewing, and responding to feedback at departmental and committee meetings. The feedback is used to meet the needs expressed by faculty and staff for continuous improvements in programs and services. Senior administration values and promotes ongoing communication at all levels of the University and communicates with employees through faculty and staff meetings, strategic planning sessions, unit meetings, committee and council meetings, and faculty and staff forums. Faculty and staff are encouraged to take an active role in the decision-making process by volunteering for University committees. Committees, councils, and meetings are a tool used to empower employees, build morale, and facilitate communication by allowing employees to participate and provide feedback on the decision-making and strategic planning process of the University. The University seeks to build morale by hosting back-to-school orientation and activities for new and returning faculty and staff, an awards ceremony, and a faculty and staff picnic to show appreciation to employees. The Office of Advancement sponsors welcome back events for faculty and staff at the beginning of each semester.

The Academic Affairs Council meets bi-weekly to discuss curriculum, pedagogy, and continuous improvement in program and services for our students. This information is communicated to all full and part-time faculty through meeting minutes and department meetings. In order to facilitate better management, evaluation of faculty, advisement of students, and accountability for budgets, the Academic Affairs unit has just undergone a departmental reorganization with the recent approval of the new Faculty Manual on August 10, 2007. The previous structure consisted of twelve academic programs (each headed by a program director), housed in three divisions (each headed by a division coordinator). Now, the three divisions and twelve academic programs have been collapsed into eight departments, each headed by a department chair. This new academic structure is more in line with USCB’s mission and goals.

The EPMS is a crucial component in communicating, coaching, and empowering employees to meet strategic priorities. This process serves as the foundation for planning work priorities,
professional development, evaluation of employee performance, and is tied in with pay-for-performance. Faculty are evaluated through courses evaluations, an annual evaluation from the Executive Vice Chancellor for Academic Affairs for Academic Affairs, faculty peer reviews, tenure and promotion processes and post-tenure reviews that are tied in with pay-for-performance merit raises.

2. How do you evaluate and improve your organization and human resource related processes?
Ongoing staff education and one-on-one training will ensure that processes are followed. There is little flexibility in the organizations in the USCB HR process. Many policies are mandated by the state of South Carolina and the USC system. USCB evaluates and improves the organization and HR related processes by setting annual goals and objectives, assessing annual objectives, collecting data and using results for continuous improvement.

Senior leaders encourage employees to seek personal and professional growth opportunities that could lead to job enhancement and promotion. Employees are encouraged to join professional organizations relevant to their positions and to avail themselves of training opportunities that will assist them with career growth. A faculty mentoring program has been established for new faculty and employees are encouraged to attend conferences in their field for job improvement, professional development and career expansion. Coaching and mentoring are provided to new employees within their respective units and unit heads and supervisors provide a great deal of informal transfer of knowledge to their colleagues. Employees are encouraged to take University classes at no charge and earn advanced degrees while employed. USC provides on-going professional development and training at no charge to employees where they can explore the many opportunities for personal and professional growth available through a host of workshops sponsored by the Office of Human Resources.

The key to success in any organization is to link job responsibilities with the university mission and its strategic priorities. USCB’s Strategic Plan integrates critical goals and objectives for all units campus-wide. Additionally, each of the academic programs has defined statement of purpose, directly linked to USCB’s mission. In the broad context of USCB’s strategic goals, each program will strengthen academic offerings, expand and diversify the student population, and provide an environment conducive to teaching and learning. USCB also has established evaluation and assessment methods designed to ascertain attainment of educational goals at both the institutional and academic program level.

3. How do you achieve effective communication and knowledge/skill/best practice sharing across departments, jobs, and locations?
USCB is one University with two full-service campuses and offers courses at the two military installations in Beaufort. Effective communication is accomplished by the use of voicemail, email, and interactive video technology to broadcast meetings between the campuses. Employees share time between the campuses and travel between the sites to ensure that programs, courses and services are available to all constituents. Faculty, staff and administration are encouraged to attend conferences and professional development opportunities where best practices are shared and brought back to University staff through cross-training and transfer of employee knowledge.
through in-house training. The Chancellor delivers several updates, during the month. Units are tasked with weekly meetings to inform, alert, and communicate to staff members.

4. **How does your faculty and staff performance management system, including feedback to faculty and staff, support high performance work and contribute to the achievement of your action plans?**

   Senior administration motivates and encourages employees through the EPMS. The EPMS is a crucial component in communicating, coaching, and empowering employees to meet strategic priorities. This process serves as the foundation for planning work priorities, professional development, evaluation of employee performance, and is tied in with pay-for-performance.

   Faculty are evaluated through course evaluations, an annual evaluation from the Executive Vice Chancellor for Academic Affairs, faculty peer reviews, tenure and promotion processes and post-tenure reviews that are tied in with pay-for-performance merit raises. The flow of communication begins with Senior Administration who are the team leaders for their units and communicate with faculty and staff by listening, reviewing, and responding to feedback at departmental and committee meetings. The feedback is used to meet the needs expressed by faculty and staff for continuous improvement in programs and services. Faculty and staff are encouraged to take an active role in the decision-making process by volunteering for University committees. An awards ceremony, presided over by the Chancellor and Executive Vice Chancellor for Academic Affairs that recognizes the accomplishments of faculty and students is held annually. Faculty and staff are eligible for annual pay-for-performance increases that are tied directly to annual performance appraisals which include areas that need improvement and specific steps for improvement. USCB strives to publicly acknowledge the achievements of faculty, staff and students by recognizing them in University and community public relations mediums.

5. **How do you accomplish effective succession planning? How do you manage effective career progression for all faculty and staff throughout the organization?**

   Senior leaders encourage employees to seek personal and professional growth opportunities that could lead to job enhancement and promotion. Senior leadership encourages staff to participate in education and training related to their responsibilities and incorporating the new information and strategies into the work culture through cross-training and in-service workshops. Employees are encouraged to join professional organizations relevant to their positions and to avail themselves of training opportunities that will assist them with career growth.

   A faculty mentoring program has been established for new faculty and employees are encouraged to attend conferences in their field for job improvement, professional development and career expansion. Coaching and mentoring are provided to new employees within their respective units while unit heads and supervisors provide a great deal of informal transfer of knowledge to their colleagues. The University has clear definitions of roles and responsibilities for each position available so that employees can review the job descriptions and prepare for advancement. Employees are encouraged to take University classes at no charge and earn advanced degrees while employed to permit career expansion within the University. Senior leaders serve as role models to all employees by belonging to organizations that help them do their jobs better while transferring newly gained knowledge back to their staff. Faculty and staff
have the opportunity to be involved in several areas of the institution. As USCB grows, many opportunities will continue to evolve. Our continued growth in enrollment will foster the need for more support services within our organization.

6. How do your faculty and staff education, training, and development address your key organizational needs? How do you evaluate the effectiveness of this education and training? How do you encourage on the job use of new knowledge and skills?

Annually, a Professional Development calendar is available at [http://hr.sc.edu/profdevp.html](http://hr.sc.edu/profdevp.html) where all employees can explore the many opportunities for personal and professional growth available through a host of workshops sponsored by the office of Human Resources. Employees are encouraged to seek personal and professional growth opportunities that could lead to job enhancement and promotion. Internally, seminars are held on a number of topics including customer service, technology, aids awareness, and the EPMS. USCB holds an annual Faculty and Staff Education program to address university wide issues including but not limited to, grants, business office procedures, accreditation processes, student services, library services and technology seminars. Employees are encouraged to join professional organizations relevant to their positions and to avail themselves of training opportunities that will assist them with career growth and incorporate the newly learned information and strategies into the work culture through cross-training and in-service workshops. Staff are afforded the opportunity to take numerous professional development courses through our Columbia campus as well as other organizations such as the Southern Association of College and University Budget Officers (SACUBO), National Association of College and University Budget Officers (NACUBO) and Council for Advancement and Support of Education (CASE). The goal is to increase the knowledge of our staff members so that they can better serve our public.

7. How do you motivate faculty and staff to develop and utilize their full potential?

Faculty, staff and administration are encouraged to attend conferences and professional development opportunities where best practices are shared and brought back to University staff through cross-training and transfer of employee knowledge through in-house training. Annually, a Professional Development calendar is available at [http://hr.sc.edu/profdevp.html](http://hr.sc.edu/profdevp.html) where all employees can explore the many opportunities for personal and professional growth available through a host of workshops sponsored by the Division of Human Resources.

Staff motivation is provided through numerous avenues. Managers must provide the needed feedback through the EPMS process to allow for the growth of our staff. As USCB continues to expand, many opportunities are becoming more apparent and need attention. Our goal is to continue to grow our current staff and challenge each employee with new opportunities thus making them a part of our current growth.

8. What formal/informal assessment methods and measures do you use to obtain information on faculty and staff well-being, satisfaction, and motivation?

USCB plans to dedicate more attention to evaluating faculty and staff satisfaction this year by developing assessment tools to monitor employee well being and satisfaction and using the results of the assessment to make improvements in this area. Beacon is the forum for staff to discuss concerns with senior administration. The faculty organization is the forum for faculty to discuss concerns with administration. In the past year, faculty surveys were conducted by the
faculty organization. The FSSE survey was administered in spring 2007. The results will be used to identify areas for improvements. The IER office is in the process of developing a satisfaction survey for faculty and staff. The office of Human Resources provides annual training sessions on numerous topics. Surveys are conducted after each information session to ensure we are addressing the needs of the faculty and staff.

9. How do you use faculty and staff satisfaction assessment findings to identify and determine priorities for improvement?
Feedback from faculty and staff surveys and forums are used to implement polices to correct identified areas of need. USCB is a growing institution that is seeking to improve its performance in many areas. Effective communication is the key as we continue to communicate our need to streamline our current process and thus provide better services. The office of Academic Affairs sought to enhance the productivity of faculty by developing a competitive program to allow faculty course releases each spring for research. The funds were allocated in 2005-06 and the Faculty Development Committee was assigned the task of further developing the program. The program will be completed and in operation during the 06-07 academic year. The incentive to conduct research to further help the community is essential to ensure a balanced relationship with the community.

10. How do you maintain a safe, secure and healthy work environment? (Include your workplace preparedness for emergencies and disasters.)
USCB has established a systematic prevention-based approach to safety and health for all students, employees, customers, and visitors through the development and implementation of a Safety Management Program. Our Public Safety Officer, Director of Maintenance and the Vice Chancellor of Finance are members of this team which meets monthly. Senior leadership has included several other key members of the institution to ensure we capture as many perspectives as possible. An appointed Safety Committee directs on-going agency-wide safety initiatives, collects and analyzes safety related data, makes recommendations for improvement, and monitors the implementation of recommendations and effectiveness. USCB conducts monthly hazard inspections of agency facilities to identify and evaluate environmental deficiencies, hazards, and unsafe practices. USCB will begin the process of conducting monthly fire and emergency drills on a regular basis. Our organization also tracks crime reports within the local jurisdiction as we must submit our Annual Security Report in accordance with the provisions of the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act.

Category 6 - Process Management

1. How do you determine and what are (list) your key learning-centered processes that deliver your educational programs, offerings, and student services?
USCB solicits input from students, faculty, staff, stakeholders, suppliers, and partners to help determine our key learning-centered process requirements. Senior leadership and unit heads determine areas of emphasis for organizational involvement and support through the University’s ongoing Institutional Effectiveness and Strategic Planning Framework/Process initiatives and communicates information to administration, faculty, staff and students via face-to-face meetings, committees, and weekly electronic updates. A University-wide SWOT analysis and input by all areas of the University is done through responses to surveys and/or questionnaires.
from the IEC. Each unit is responsible for identifying key learning centered processes for their area and identifies, assesses, and uses the results for improvement annually in the IE-OA Reports. The Director of Institutional Effectiveness and Research compiles and analyzes the data from the institutional analysis in which the strengths, weaknesses, opportunities and threats of the University are identified, along with the results of the IE-OA Reports, and presents the information to the IEC, the Chancellor and the Administrative Council. Extensive discussions center on how best to address a variety of issues and how to develop appropriate strategies and objectives to advance the institution. Needs assessments, market research, and other data are used to identify and make decisions on the following learning centered process requirements:

- Providing a balance of courses at all locations
- Providing complete degree programs at all locations
- Providing adequate student services at all locations
- Providing transportation between sites
- Addressing the lack of state funding
- Increasing the number of courses delivered through distance delivery including IVC, Hybrid, Blackboard, Tegrity

2. How do you incorporate input from students, faculty, staff, stakeholders, suppliers and partners for determining your key learning-centered process requirements?
USCB solicits input from students, faculty, staff, stakeholders, suppliers, and partners to help determine our key learning-centered process requirements. Focus groups, needs assessment surveys and extensive discussions with internal and external constituents center on how best to address a variety of issues and on developing appropriate strategies and objectives to advance the institution. A University-wide SWOT analysis and input by all areas of the University is done through responses to surveys and/or questionnaires from the IEC. Each unit is responsible for identifying key learning centered processes for their area and identifies, assesses, and uses the results for improvement annually in the IE-OA Reports.

3. How do you incorporate organizational knowledge, new technology, cost controls, and other efficiency and effectiveness factors, such as cycle time, into process design and delivery?
New technology has been an important factor in continuous improvement in student learning and improved student satisfaction. Technology advances in recent years have positively impacted communication and other processes at USCB. We are currently implementing a new query system called IntelliResponse on the USCB Home Page that allows students and stakeholders to ask questions and receive an instant response. Holding meetings and focus groups provides ongoing communication with those we serve in order to incorporate improvements within the institution.

4. How do you systematically evaluate and improve your learning center processes?
USCB uses the Institutional Effectiveness and Strategic Planning Framework/Process to continuously review and improve all University processes.

5. What are your key support processes and how do you evaluate, improve and update these processes to achieve better performance?
USCB’s overall processes are reviewed on an annual basis using the Institutional Effectiveness and Strategic Planning Framework/Process.

The Office of University Advancement incorporates two critical areas that support the university: Marketing and Communications and Institutional Development and Alumni Relations. As a new four-year institution, USCB is establishing and documenting the basic business processes it has in place and those areas into which it needs to expand. This documentation for University Advancement has begun in the Marketing and Communications area as a pilot program. It will proceed through each area. Once the business processes have been documented and reviewed for improvement, University Advancement would like to start a program of effectiveness assessment. These customer assessments will enable us to start a program of customer led continuous improvement. Outreach assessment initiated in 2006-07 are; (1) a phone survey of prospective students calling into the Admissions office as a result of May advertising; (2) direct mail with directed response to the web page; (3) joint development of products with client units such as the Academic Units and Student Development that allows direct input in evaluating products.

The Office of Finance and Operations continues to provide quality service to its customers. Finance and Operations maintains a user friendly approach to solve and deliver the needed goods or services. The goal for this unit is to provide services in an efficient manner.

The Office of Information Technology continually analyzes the current support structure in order to provide a more consistent point of contact. Through consistent communication with focus groups, we evaluate the effectiveness of each support structure to ensure better delivery of systems and provide timely solutions to problems.

6. How does your organization ensure that adequate budgetary and financial resources are available to support your operations? How do you determine the resources needed to meet current budgetary and financial obligations, as well as new education related initiatives?

Resources are determined by three factors:

- State Appropriations
- County Appropriations
- Tuition and Fee Revenues

Resources are allocated based on enrollment and planned new academic programs. Once a new academic program is developed, USCB develops a plan for support services that include office support, facilities, library materials, public safety and general student support services.

Category 7 – Organization Performance Results

USCB is still developing baseline data and collecting comparison data since obtaining four-year baccalaureate degree-granting status in 2004.

7.1 What are your performance levels and trends for your key measures on student learning and improvements in student learning? How do your results compare to those of your competitors and comparable organizations?
Since 2004, USCB has grown from 6 to 12 baccalaureate degree programs. Chart 7.1-1 shows the growth in the number of baccalaureate degree programs.

Charts 7.1-2 and 7.1-3 show the shift in students enrolled in bachelor degree programs instead of associate degree programs or “no major.” We expect this trend to continue as more programs are added and students continue to declare majors. Associate degree programs are only available to active duty military personnel and their family members.
USCB participated in the National Survey of Student Engagement (NSSE) in Spring 2007. The results will be useful in shaping the next strategic planning process and Quality Enhancement Plan (QEP) as well as informing the university on areas we can improve upon. Chart 7.1-4 shows the weighted mean comparison of USCB freshmen and seniors to national counterparts who took the NSSE in Spring 2007 on the benchmark level scores related to academic challenge. According to NSSE, “Challenging intellectual and creative work is central to student learning and collegiate quality.”

In the NSSE Benchmark comparison report for USCB, it states, “Students learn more when they are intensely involved in their education and asked to think about what they are learning in different settings.” Chart 7.1-5 shows the weighted mean comparison for USCB against nation data on benchmark scores related to active and collaborative learning.

To aid in program assessment, the Biology, History, and Business programs administered the Major Field Tests in Spring 2007. This baseline data will be analyzed and used for continuous improvement of the degree programs. We also administer a Graduation (exit) survey which provides feedback to the programs. Some departments are developing internally constructed exams that measure content knowledge in their majors. Early Childhood Education majors are required to take the PRAXIS I and II. Chart 7.1-6 shows the 05-06 Praxis II pass rates for USCB as well as other public 4 year institutions within the state.

#### 7.2 What are your performance levels and trends for your key measures on student and stakeholder satisfaction and dissatisfaction? How do your results compare with competitors and comparable organizations?

Advisement surveys, student evaluations, graduate (exit) survey, and alumni surveys are used to measure student satisfaction. Comparative data for higher education institutions appears on CHE Performance Funding website and appears on the websites of the 33 public colleges and universities in SC. The following two charts (7.2-1 and 7.2-2) illustrate that our students are satisfied with the availability of faculty and the interest shown to them by faculty as reported on the 2007 graduate exit survey.
Referring back to our NSSE results, Chart 7.2-3 shows the weighted mean comparison of USCB freshmen and seniors to national counterparts on the benchmark level scores related to student-faculty interaction. The NSSE report states, “Students learn firsthand how experts think about and solve practical problems by interacting with faculty members inside and outside the classroom. As a result, their teachers become role models, mentors, and guides for continuous, life-long learning.”

7.3 What are your performance levels for your key measures on budgetary and financial performance, including measures of cost containment, as appropriate?
Levels are predicated based on current enrollment. Expanding our enrollment allows our institution to grow and affords our students a top notch education, safe environment and state of the art infrastructure. Each semester enrollment is tracked to ensure that our budget projections are on target.

7.4 What are your performance levels and trends for your key measures on work system performance, faculty and staff learning and development, and faculty and staff well-being, satisfaction, and dissatisfaction?
Faculty receive annual evaluations from the EVCAA and from students via course evaluations. The university uses the EPMS format to evaluate staff performance and gives them an opportunity to respond to the evaluation. Staff satisfaction can be discussed during Beacon
meetings as well as with their immediate supervisor. All employees are encouraged to seek professional development opportunities. Ten thousand dollars is available annually for faculty to compete for a course release in order to pursue research activities (one per division each spring). In addition, full time faculty are given $600 per year to use for professional development. The Faculty Welfare Committee conducts faculty surveys that are shared with the administration.

This past year, the eleven program directors and three division coordinators were awarded one course release per semester to handle the administrative duties for their programs and divisions. The release time allowed program directors and division coordinators to develop unit plans, create a balanced schedule of course offerings at the four locations, develop curriculum, and work on accreditation issues as well as other assigned duties pertaining to their program.

In Fall 2003, USCB offered only an AA and AS degree. In Spring 2004, the university added six baccalaureate degree programs. In 2004-05 there were six academic programs, an AA and AS, and three divisions. In 2005-06 four new baccalaureate degrees were added, two in the fall and two in the spring. In 06-07, Nursing and an Liberal Studies with a concentration in Security Studies, were added.

Chart 7.4-1 shows the number of courses released for faculty to develop the new programs.

Chart 7.4-2 shows the average faculty salary comparison of USCB with other four year institutions within South Carolina. This shows that the university is striving to offer competitive faculty salaries.
Chart 7.4-3 shows the distribution of faculty and staff across the University for the past two years. In line with our mission of teaching, the majority of our positions are faculty positions. We have sufficient staff to support the academic and support services at present, but as new programs and services are added, more will be needed. USCB conducted 17 national searches for new, replacement and upgraded faculty positions in 2007, which is a 30% increase in new full time faculty and instructors. The resulting group of new faculty members and successful internal candidates assuming larger roles brings a wave of energy, expertise and leadership to USCB in the 2007-2008 academic year and beyond.

Chart 7.4-4 shows the average amount of external funding per full-time faculty member.

7.5 What are your performance levels and trends for your key measures of organizational effectiveness/operational efficiency, learning centered and support process performance (these could include measures related to the following: student performance and development; the education climate; responsiveness to student and stakeholder needs; supplier and partner performance; cycle time, and other appropriate measures of effectiveness and efficiency).
Performance of key measures is monitored through the Institutional Effectiveness Cycle, using annual IE-OA reports from each unit. Retention and graduation rates are studied to identify...
trends. Chart 7.5-1 shows the retention rates for a six year period. This is a one-year retention rate that shows the percentage of first time freshmen that started during fall of one year who returned to USCB in the fall of the next year. The data prior to 2004 are based on associate degree seeking students since USCB became a baccalaureate degree-granting institution in 2004. The drop in retention rate for 2003 was due to several factors including a number of active military deployed to Iraq from the two bases in Beaufort, military dependents relocating to be with their families while their spouses were in Iraq, students transferring to other institutions, and possibly the shift from a two-year to a four-year institution. USCB continues to study the retention of students and investigate ways to increase this percent. Students who transfer within the USC system are not included in this rate. The USCB Enrollment Management Team studied the 2005 cohort and discovered that poor academic performance was not a significant issue relating to retention.

Chart 7.5-2 shows the graduation rates for associate degree seeking students within 150% time to degree. USCB’s cohorts prior to 2004 were only associate degree seeking students, but the rates for 2000 forward include students who graduated within three years with an associate degree or six years with a bachelor’s degree. Rates for 2001 and 2002 will increase as more students graduate with bachelor’s degrees.

Chart 7.5-3 shows the number of degree awards at USCB. This illustrates the decline in associate degrees and increase in baccalaureate degrees as more programs became available.
Once again according to NSSE, “Students perform better and are more satisfied at colleges that are committed to their success and cultivate positive working and social relations among different groups on campus.” Our NSSE data shows our weighted mean related to a supportive campus environment as slightly below for first year students but slightly above the national average for seniors. The formation of the Center for Instructional Technology and Academic Resources will help address this issue for freshmen. Through student life and athletics there will be more opportunities for social interaction as well.

Chart 7.5-5 shows the number of courses taught using distance education delivery. Interactive Video Technology (IVC) connects a classroom on each of the two campuses so that instructor is teaching both sections simultaneously. This allows us to work efficiently yet be responsive to student needs. Internet courses are a flexible and popular way for students to earn credit toward achieving their educational goals. This allows us to work efficiently yet be responsive to student needs.

Chart 7.5-6 on the next page shows the growth in Community Outreach activities from 2005-2006 to 2006-2007. Osher Lifelong Learning Institute (OLLIL) memberships passed the 1,000 marked which means an increase by more than 26%. Participation levels in all Continuing Education programs increased significantly: 234% for Spanish and ESL, 34% for Lunch with Author and Historical Tours, and 8% for Continuing Medical Education, which strives to provide high quality medical training to local, regional, and national medical professionals in partnership with USC SOM PRH and The Sea Pines Resort. The average registration for the medical education conferences increased from 55 to 69 per conference.
7.6 What are your performance levels for your key measures related to leadership and social responsibility?

a) accomplishment of your organizational strategy and action plans

The organizational strategy and actions plans are accomplished using the USCB Institutional Effectiveness and Strategic Planning Framework/Process.

b) stakeholder trust in your senior leaders and the governance of your organization

Strong leadership is vital as USCB strives for continuous improvement in academic programs, student support services, and improved customer and stakeholder satisfaction. The leadership at USCB has established the Core Values of Integrity, Collaboration, Innovation, Responsiveness, Accountability and Excellence that the faculty organization has approved and the University family has embraced. The Chancellor and Administrative Council (Senior Leadership) model these Core Values to faculty and staff daily in their personal and professional actions, and in turn articulate them to their units as standards by which all academic and support services staff will function as they uphold and carry out the goals and mission of the University. Under the leadership of the Chancellor and the Administrative Council, University policy, procedures, direction, and other issues are developed and reviewed on a weekly basis. Information from the Chancellor and Administrative Council is delivered to faculty, staff, suppliers, partners and stakeholders in a number of ways previously mentioned in this document.

Ethical behavior is maintained by adherence to The Carolina Creed. Choosing to join the USC community obligates each member to a code of civilized behavior. Students conform to The Carolina Creed, the USCB Academic Code of Conduct, and the Student Code of Conduct. Students of the University are expected to be honest and forthright in their academic endeavors. All members of the University community are expected to use reasonable judgment in their daily campus life and to show due concern for the welfare and rights of others. Conduct rules,
disciplinary penalties, and complete hearing procedures are contained in the USCB Student Handbook.

Administrator and faculty evaluations, staff evaluations using the EPMS system, annual reviews by the USC President and Board of Trustees, adherence to USC policies and procedures, annual reports to the Jasper and Beaufort County Councils, external reviews by SACS, and voluntarily seeking accreditation from external agencies such as NCATE, AACSB, CSHSE, SC Board of Nursing, and the CCNE for several of our baccalaureate programs are other ways we ensure stakeholders of USCB’s commitment to academic excellence in program and support services and integrity in our governance system.

c) fiscal accountability; and, regulatory, safety, accreditation, and legal compliance
All unit/subunit heads are responsible for monitoring and maintaining legal and regulatory accountability in their respective University offices and follow state and federal regulations and USC policy and procedures. Unit heads communicate regularly with the appropriate legal authorities from regulatory agencies. Fiscal accountability is maintained by adherence to state and federal laws and measured through annual state and federal audits. The State Budget Office, State Legislature and Governor’s Office, and USC Budget Office provide oversight as the University budget is developed annually. The University provides data to the state and federal government in a timely manner relating to Performance Funding, IPEDS, CHEMIS, financial aid, and other data for accountability purposes. The IER staff works closely with CHE and SACS to ensure that USCB is in compliance with accreditation regulations.

A security plan has been completed, and new procedures have been established for our academic labs. The plans are needed due to our transition from a two-year to a four-year school and because we now have on-campus housing. USCB is continually evaluating and updating our emergency preparedness plans. Because USCB is in an area susceptible to hurricanes, it is our duty to inform students, faculty, and staff of impending danger in a timely manner, in order to ensure their safety. In 06-07, USCB purchased two new security supplies: a Critical Incident Management template system and Opt In for text messages. In the wake of the Virginia Tech shootings, USCB has procured a security response text message system that alerts students, faculty and staff regarding public safety on campus.
